4

1. RF output level adjustment---Knob, adjustable RF output level
2. AV ratio adjustment---Knob adjusts the output of the A / V ratio
3. volume adjustment---Knob to adjust the output volume size
4. brightness adjustment---Knob to adjust the brightness of the output image

2.2 Rear Panel

- A. Output test port: Video output test port,-20dB;
- B. RF output: Multiplexer module modulated, after mixing the RF output;
- C. RF output regulation: Knob, adjustable RF output level;
- D. Power cascade output  
Superposition of multiple modulators, you can cascade output therefrom to other power modulator to reduce power outlet occupation; careful not to cascade more than 5 to avoid excessive current.
- E. Power Input: Power Input: AC 220V 50Hz/110V 60Hz;
- F. RF input
- G. HDMI input
