

SFT-8640 **40dB Gain Amplifier**

INTRODUCTION

The SFT-8640 is a commercial quality amplifier with 30dB gain across a bandwidth of 50 ~ 860 MHz. The output of this amplifier is easily adjusted by using the front panel gain control with 40dB gain control range.

FEATURES

1. 40dB gain
2. Frequency range of 50 ~ 860 MHz
3. Tilt and gain control in the front panel
4. Excellent value
5. -20dB test port

SPECIFICATION

INPUT			
Input Connector		75 Ω F-Female	
Frequency Range		50~860MHz	
Gain		40dB	
Flatness		±1.0dB	
Gain Control		10dB	
Tilt Control		10dB	
OUTPUT			
Output Connector		75 Ω F-Female	
Test Point Loss		20dB	
GENERAL			
Mounting	Wall-mounted	Operating Temperature	0 ~ 50 ℃
