SWR-1200L2

1200M WIFI Router

SWR-1200L2 is a 1200M 11AC dual-band wireless router specially designed for large-sized apartments.The router equipped with 64MB memory, which has larger data cache space, enables the system to run fast and stably.The built-in independent PA / LNA signal enhancement module and external 4 high-gain omnidirectional antennas produce strong signal penetration performance,which truly help to achieve the full coverage of
dual-band WIFI in large-sized apartments. SWR-1200L2 is widely used in various applications such as wireless relay, LED light / WIFI timer switch, USB sharing etc. It is an ideal router for requirement of large coverage, signal penetration and smooth surfing.
