SWR-2100

2100M Gigabit WIFI Router

SWR-2100 is a 2100M 11ac dual-band wireless router specially designed for villas and large apartments with over 100Mbps FTTH network.The router has built-in dual-core CPU and is equipped with DDR3 memory, which enable the system to run fast and stably. With 128MB large memory,it has a larger data cache space to guarantee game acceleration and more functions. The built-in independent PA / LNA signal enhancement module and external 6 high-gain omnidirectional antennas produce strong signal penetration performance,which truly help to achieve the full coverage of dual-band Wifi in villas and large apartments. SWR-2100 is widely used in various applications such as wireless relay, LED light / WiFi timer switch, USB sharing etc. It is an ideal router for requirement of large coverage, signal penetration and smooth surfing.

2.4G 5G — Dual-band	Dual-core CPU	Full Gigabit Ports
Extended 6x antennas	MU-MIMO	Dual wireless CPU — Ipv6

Specification

✳ **Chipset**	MT7621A+MT7615N+ MT7603E	📄 **Wireless Standards**	IEEE 802.11ac/n/a 5GHz
💾 **Memory/Storage**	128MB/16MB		IEEE 802.11b/g/n 2.4GHz
⚙ **Interface LAN Ports**	4×10/100/1000Mbps	✖ **Wireless Speeds**	300Mbps(2.4GHz)
⚙ **Interface WAN Port**	1×10/100/1000Mbps		1733Mbps(5GHz)
⚡ **External Power Supply**	12VDC/1.5A	Hz **Frequency**	2.4-2.5GHz; 5.15-5.25GHz
⬡ **W x D x H**	234×148×31mm	▢ **Wireless Modes**	Wireless Router; WISP; AP
✓ **Certification**	CE, RoHS	(•) **Antenna**	2×2.4GHz
◉ **Button**	WPS∕Reset		4×5GHz

Product Interface

WAN   PWR

LAN   WPS/RST
